**Share your feelings after using barrier-free facilities to
get a travel coupon for two!**

Open until July 20, 2014, you can share your experiences of using barrier-free facilities in all the National Scenic Areas and transportation systems in Taiwan on the IOT website (www.iot.gov.tw). All entrants can enter a lottery to win a travel coupon for two! Twenty coupons are waiting to be won!

In order to upgrade the environmental barrier-free quality, the MOTC plans to improve the facilities through users' real experiences. To share your experiences, you can enter the competition on the campaign homepage ("Links of lovely life") on the IOT website. Tell us the location details and your experiences of using the barrier-free facilities, and upload at least one photo or a video to further show your feelings. Or, you can share your experiences by using the "礙分享  " app on the Google Play Store. Then, you will have a chance to win a coupon. A lucky draw is planned to be held on September 30, 2014. Two groups, good and poor experiences, are to be drawn separately. The positive entries concerning design or convenient use will be in the good experiences group. The negative entries will be in the poor experiences group. There are ten travel coupons available for the winners in each group. You will be notified by e-mail if you win a coupon. All are welcome to participate in the campaign competition!

Please recall your feelings after you have used the barrier-free facilities, and take photos or a video to further describe your experiences. Please make sure you record the location details of

the facilities. It will help the authorities to find the appropriate facilities in order to carry out any suitable improvements.
